WHO I AM

I consider myself principally a Python developer. I have spent the past three years developing a diverse range of software in Python, from ETL pipelines to password generators to combinatoric optimizers. But by far most of my time has been spent developing a single web application, consisting of $\approx 14,000$ lines of code in Python, Flask, and SQLAlchemy, in the pursuit of my obsession with literature: anno.wiki.

FREE TIME

I love high culture. Wine, literature, music, art, cinema; anything that makes life worth living. And running.

CLOSING ARGUMENT

I have had enough experience learning new things to have full confidence in my ability to learn new things.
